Commenting on the Q4 & FY22 results Mr. Vinay Tripathi, Managing Director of the company said:

“Despite weak economic scenarios, revenues for Q4FY22 grew by 89% & FY22 grew by 120%, however margins were adversely impacted for the current quarter on the back of geo-political tensions, impact of third wave of Covid-19 and disruptions in the supply chain across the globe.

Due to inflationary environment & Ukraine-Russia war there was a sharp increase in the freight rates, higher loading/unloading & storage charges which will be passed on to the customer with a quarter lag’s time, however there are some one-time cost which will be borne by Accuracy. We have been witnessing the situation coming to normalised levels and are optimistic of better realisations going forward which should stabilize & increase the margins.

*The silver lining to this is, we have been able to build trust & confidence of customers in Accuracy & were able to on-board new customers & increase the wallet share of existing customers by offering end-to-end solutions for there logistical requirements. We have been seeing a massive shift in the **consumer behavior from unorganized to organized players** in the logistical industry during & post Covid-19 period and have witnessed higher enquires & order inflow from the Tier I & Tier II cities for logistics partners with customized supply chain solutions and tech based operations.*

We appreciate the active reforms by the government on improving the logistics network of India by creating the right infrastructure and policies for the overall benefit of the industry and we have been building capacities and capabilities in various areas of our business to capitalize on this huge runway of opportunity lying ahead of us.

*We still have our three-fold strategy in place of **revenue diversification, industry diversification and addition of wallet share in existing customers** by cross selling additional services all under one roof. We are confident of this strategy playing out in the short to medium and are optimistic of witnessing higher growth in revenues & profitability going forward.*

*At ASL, we are committed towards providing **end to end logistics services across the value chain** and innovating our business model as per the needs of the customers and business.”*
