Dear Sir / Madam,

**Accuracy Shipping Limited** has entered into a strategic partnership with MatchLog Solutions to implement a greener logistics initiative aimed at optimizing container reuse across key EXIM trade corridors in India.

The partnership is expected to contribute to operational efficiency and sustainability by reducing carbon emissions, minimizing empty container movements, and improving overall resource utilization.

The Press Release is self-explanatory.

This is for your information and record.

### **Accuracy Shipping Limited leads greener logistics initiative in collaboration with MatchLog Solutions**

Accuracy Shipping Limited (“ASL”), a leading global logistics service provider, has announced a strategic partnership with MatchLog Solutions, a pioneer in sustainable logistics and supply chain optimization, to drive a greener initiative aimed at streamlining EXIM container flows across India’s key trade corridors. This collaboration underscores ASL’s commitment to enhancing operational efficiency while minimizing environmental impact through intelligent, technology-led solutions.

As part of this initiative, ASL will leverage its extensive logistics infrastructure, customs clearance capabilities, and pan-India operational footprint in combination with MatchLog’s AI-driven triangulation engine. This will enable real-time reuse of import containers for export requirements, reducing unnecessary empty container movements, idle driver hours, and fuel consumption—making a meaningful contribution to India’s climate and sustainability goals.

Commenting on the initiative, Mr. Vinay Tripathi, Managing Director, ASL, said:

“Our goal has always been to bring speed, efficiency, and transparency into every link of the supply chain. With MatchLog’s platform, we are able to go a step further in optimizing container utilization at scale while meeting the evolving needs of our customers. It is about embracing the future of logistics where every move is meaningful, planned, and data-driven. We see this as a natural evolution of our services.”

Mr. Harsh Vardhan Gupta, CEO (India), MatchLog, said:

“This collaboration represents the shift from a reactive to a predictive model of container logistics. Instead of building more infrastructure, we are making existing networks smarter. With Accuracy Shipping’s on-ground strength and our technology-led reuse ecosystem, we are creating a new operating model; one that’s faster, leaner, and purpose-built for scale. This is the kind of transformation India’s supply chains need.”

This initiative also supports MatchLog’s global objective of eliminating 10 billion kilometres of unnecessary travel in the EXIM container supply chain. Together, the companies aim to redefine how India’s container logistics sector functions—moving towards a more agile, efficient, and environmentally conscious future.

### **About Accuracy Shipping Limited (ASL)**

Accuracy Shipping Limited (ASL) is a leading provider of end-to-end logistics solutions, offering a range of customized services, including transportation, freight forwarding, clearing and forwarding services, customs clearance, warehousing, and value-added services. ASL operates 14
